SUMMARY

DevOps fresher (MCA, CGPA 8.42) with internship experience in CI/CD pipelines, containerized deployments and AWS infrastructure. Skilled in Jenkins, GitHub Actions, Docker, Kubernetes, Terraform and Prometheus/Grafana, with DevSecOps exposure to SonarQube and Trivy. Built projects covering infrastructure as code, secure CI/CD, monitoring and live deployments.

SKILLS

Cloud & Infrastructure: AWS (EC2, EKS, VPC, IAM, Route 53, Load Balancing), Cloud Networking

CI/CD & DevOps: Jenkins, GitHub Actions, Maven, Argo CD, CI/CD Pipelines, Netlify

Containers & Orchestration: Docker, Kubernetes (Deployments, Services), Containerization

Infrastructure as Code: Terraform, Automated Deployments, Ansible (basics)

Monitoring & Reliability: Prometheus, Grafana, Node Exporter, Blackbox Exporter, Troubleshooting, Root Cause Analysis

DevSecOps & Security: SonarQube, Trivy, Container Image Scanning

Programming & Tools: Python, Bash, Java, REST APIs, Webhooks, JSON, Git, GitHub, Linux (Ubuntu, CentOS)

EXPERIENCE

AI & Backend Intern **Apr 2026 – Nov 2026**

SIRPI Products & Services Private Limited, Bengaluru, India

- Built backend workflows and REST API integrations using Python and Git in a collaborative engineering team.
- Contributed to AI/ML model integration work with Gemma and Chandra models and text-processing pipelines.
- Built and delivered an OCR project for a real-world client (client name confidential).
- Built ServicePulse, a customer retention and AMC service platform, and deployed it live on a custom domain.

DevOps Intern **Aug 2025 – Nov 2025**

Inventeron Technologies and Business Solutions LLP, Bengaluru, India

- Built and automated CI/CD pipelines using Jenkins, GitHub Actions, Git and Docker to streamline build and deployment.
- Deployed containerized applications with Docker and Kubernetes, managing service configuration and reliability.
- Provisioned and configured AWS EC2 infrastructure to support application deployment.
- Monitored application and infrastructure health with Prometheus and Grafana, troubleshooting issues to improve reliability.

PROJECTS

DevSecOps CI/CD Pipeline with Jenkins, SonarQube, Trivy & Kubernetes | Jenkins, AWS, Kubernetes, Docker

- Designed an end-to-end pipeline automating build, code quality analysis, security scanning, containerization and Kubernetes deployment.
- Deployed containerized applications on Kubernetes running on AWS EC2, with Prometheus and Grafana monitoring.

E-Commerce Cloud Platform & DevOps Implementation | AWS EKS, Terraform, Argo CD, GitHub Actions

- Provisioned AWS infrastructure with Terraform modules for repeatable, consistent environments.
- Built GitHub Actions and Argo CD workflows for Git-based continuous delivery to Kubernetes.
- Configured AWS EKS, networking, load balancing and Route 53 domain mapping for the containerized application.

GitHub–Jira Developer Workflow Automation | Python, Flask, REST APIs, Webhooks

- Built a Flask service linking GitHub Webhooks to Jira REST APIs to create tickets from events and avoid duplicates.

Website Deployment on Netlify | Netlify

- Deployed a website on Netlify and published it on a live public URL.

EDUCATION

Master of Computer Applications (MCA) | REVA University, Bengaluru | CGPA: 8.42 **2025**

CERTIFICATIONS

Microsoft Azure Fundamentals (AZ-900) | Cisco Certified Support Technician – Cybersecurity | IT Specialist – Network Security
