SUMMARY

QA Automation & Testing fresher (MCA, CGPA 8.42) with hands-on experience in manual testing, REST API testing with Postman, SQL validation and Selenium WebDriver with Java and TestNG. Built a Page Object Model automation framework with CI on GitHub Actions. Tested a transport application and a chatbot as an AI & Testing Intern and delivered a real-world OCR project for a client. Seeking a QA / Software Test Engineer role.

SKILLS

Testing: Manual Testing, Functional, Regression, Smoke, Sanity, Integration, System Testing, Test Case Design, SDLC, STLC, Agile/Scrum

Defect Management: Jira, Defect Reporting, Defect Tracking, Severity & Priority, Bug Life Cycle

Automation Testing: Selenium WebDriver, Java, TestNG, Maven, Page Object Model (POM), Data-Driven Testing (DataProvider), XPath, CSS Selectors

API Testing: Postman, REST API Testing, HTTP Methods (GET, POST, PUT, DELETE), JSON, Status Code Validation

Database: SQL, MySQL, Database Validation

CI/CD & Tools: Jenkins, Git, GitHub, GitHub Actions, Docker, SonarQube, Linux

Programming & Cloud: Java, Python, Bash, AWS (EC2)

EXPERIENCE

AI & Testing Intern **Apr 2026 – Nov 2026**

SIRPI Products & Services Private Limited, Bengaluru, India

- Performed manual testing of a transport application and a chatbot: designed test cases and executed functional, regression, smoke and sanity tests.
- Logged and tracked defects in Jira with severity, priority and steps to reproduce, following the bug life cycle in Agile sprints.
- Built and delivered an OCR solution for a real-world client project (client name confidential).
- Validated REST API responses, JSON payloads and HTTP status codes; analysed logs and configuration to find root causes of bugs.

DevOps Intern **Aug 2025 – Nov 2025**

Inventeron Technologies And Business Solutions LLP, Bengaluru, India

- Supported CI/CD pipelines using Jenkins, Maven, Git and Docker to automate build, code verification and deployment.
- Integrated SonarQube into Jenkins pipelines to enforce code quality gates before deployment.
- Kept build environments stable on Docker and AWS EC2; monitored logs with Prometheus and Grafana to find deployment issues.

PROJECTS

Web Test Automation Framework | Selenium WebDriver, Java, TestNG, Maven, POM, GitHub Actions

- Built a Page Object Model automation framework with 10 test cases covering login, logout, cart and checkout flows.
- Used TestNG DataProvider for data-driven login tests with valid, invalid and locked-out users.
- Set up a GitHub Actions pipeline that runs the full suite in headless Chrome on every push.

GitHub-Jira Workflow Automation & Defect Tracking | Python, Flask, REST APIs, Jira, Webhooks

- Developed a Flask microservice connecting GitHub Webhooks to Jira REST APIs to automate bug tracking and stop duplicate defects.
- Tested API responses and status codes under failure conditions to confirm correct error handling.

DevSecOps & Automated Quality CI/CD Pipeline | Jenkins, Java, Maven, SonarQube, Docker, AWS

- Built a CI pipeline that automates Maven builds and SonarQube analysis, with quality gates that block defective builds.
- Verified containerized deployments on AWS EC2 and used execution logs to fix configuration failures.

EDUCATION

Master of Computer Applications (MCA) | REVA University, Bengaluru | CGPA: 8.42 **2025**

CERTIFICATIONS

Microsoft Azure Fundamentals (AZ-900) | Cisco Certified Support Technician – Cybersecurity | IT Specialist – Network Security
