PROFESSIONAL SUMMARY

DevOps and Cloud Engineer with hands-on experience in CI/CD automation, AWS infrastructure, containerized deployments, Kubernetes orchestration, Infrastructure as Code, monitoring, and Python-based workflow automation. Experienced with Jenkins, GitHub Actions, Docker, Kubernetes, Terraform, AWS, Prometheus, and Grafana. Built automated delivery pipelines, API-driven workflow integrations, and cloud deployment solutions with a focus on reliability, security, troubleshooting, and developer productivity. Strong interest in Platform Engineering, developer enablement, and building scalable automation-driven infrastructure.

TECHNICAL SKILLS

CI/CD & Automation:	Jenkins, GitHub Actions, Git, Maven, Argo CD, CI/CD Pipelines
Cloud & Infrastructure:	AWS EC2, EKS, VPC, IAM, Route 53, Load Balancing, Cloud Networking
Containers & Orchestration:	Docker, Kubernetes, Containerization, Kubernetes Deployments, Services
Infrastructure as Code:	Terraform, Infrastructure Provisioning, Automated Deployments, Ansible Basics
Scripting & Programming:	Python, Bash, Java, Automation Scripting
Monitoring & Reliability:	Prometheus, Grafana, Node Exporter, Blackbox Exporter, Troubleshooting, Root Cause Analysis
DevSecOps & Security:	SonarQube, Trivy, Container Image Scanning, IAM, Security Scanning
APIs & Development:	REST APIs, FastAPI, Flask, Webhooks, React.js, JSON
Operating Systems:	Linux (Ubuntu, CentOS), Windows
Core Concepts:	Platform Engineering, Developer Enablement, SDLC, High Availability Concepts, Incident Troubleshooting

INTERNSHIP EXPERIENCE

Sirpi

AI & Backend Intern

Present

Bengaluru, India

- Contribute to real-world development and automation workflows using **React.js, FastAPI, Python, Git, and REST APIs** in a collaborative engineering environment.
- Work with **Python-based backend services and API integrations** to simplify application workflows and support developer-facing functionality.
- Contributed to AI/ML applications involving **Gemma and Chandra models**, including model integration and text-processing workflows.
- Support DevOps activities involving **Docker, CI/CD workflows, Git-based collaboration, and deployment troubleshooting**.
- Investigate application and workflow issues by analyzing system behavior, validating configurations, and identifying root causes before implementing fixes.
- Collaborate across development, AI/ML, DevOps, and testing activities, gaining exposure to cross-functional software delivery and production-oriented workflows.

Inventeron Technologies And Business Solutions LLP

DevOps Intern

Aug 2025 – Nov 2025

Bengaluru, India

- Built and supported **CI/CD automation workflows using Jenkins, GitHub Actions, Git, and Docker** to streamline application build and deployment processes.
- Worked with **Docker and Kubernetes** for containerized application deployment, service orchestration, and reliable environment management.
- Assisted with deployment and infrastructure activities on **AWS**, including EC2-based workloads and cloud infrastructure configuration.
- Monitored application and infrastructure health using **Prometheus and Grafana**, supporting issue identification and troubleshooting.
- Collaborated with development teams to resolve deployment issues, improve delivery workflows, and reduce manual operational tasks through automation.

PROJECTS

DevSecOps CI/CD Pipeline with Jenkins, SonarQube, Trivy & Kubernetes *Jenkins / AWS / Kubernetes / Docker*

- Designed an end-to-end **CI/CD pipeline** automating build, code quality analysis, security scanning, containerization, and Kubernetes deployment.
- Integrated **Jenkins, Maven, SonarQube, Trivy, Docker, and Kubernetes** to create an automation-driven secure software delivery workflow.
- Deployed containerized applications on Kubernetes infrastructure hosted on **AWS EC2** and implemented monitoring using **Prometheus and Grafana**.
- Used pipeline and monitoring outputs to troubleshoot deployment failures and identify configuration or application-level issues.

E-Commerce Cloud Platform & DevOps Implementation *AWS EKS / Terraform / Argo CD / GitHub Actions*

- Provisioned AWS cloud infrastructure using **Terraform modules**, applying Infrastructure as Code principles for repeatable and consistent environments.
- Built automated deployment workflows using **GitHub Actions and Argo CD** for Git-based continuous delivery to Kubernetes.
- Configured **AWS EKS, networking, load balancing, and Route 53 domain mapping** to support containerized application deployment.
- Implemented infrastructure and deployment automation focused on scalability, service reliability, and reducing manual configuration.

GitHub–JIRA Developer Workflow Automation *Python / Flask / REST APIs / Webhooks*

- Developed a **Python Flask automation service** integrating GitHub Webhooks with JIRA REST APIs to simplify developer issue-management workflows.
- Automated JIRA ticket creation based on GitHub events and implemented validation logic to prevent duplicate issue creation.
- Built API-driven workflow automation to reduce repetitive manual tasks and improve developer productivity.

EDUCATION

REVA University

Master of Computer Applications (MCA) – CGPA: 8.42

2025

Bengaluru, India

CERTIFICATIONS

-
- **Microsoft Azure Fundamentals (AZ-900)**
 - **Cisco Certified Support Technician – Cybersecurity**
 - **IT Specialist – Network Security**
 - **AWS Certified Cloud Practitioner – In Progress**
