PROFESSIONAL SUMMARY

Results-driven DevOps and AI enthusiast with hands-on experience in CI/CD automation, cloud infrastructure, containerization, Kubernetes orchestration, Full Stack Development, and AI/ML projects. Skilled in AWS, Docker, Jenkins, Kubernetes, React.js, FastAPI, Python, and monitoring tools. Strong understanding of DevOps practices, automation workflows, scalable application deployment, and modern software development processes. Passionate about learning new technologies and building reliable, secure, and efficient systems.

EDUCATION

REVA University

2025

Master of Computer Applications (MCA) — CGPA: 8.42

Bengaluru, India

INTERNSHIP EXPERIENCE

Sirpi

Present

AI & Backend Intern

Bengaluru, India

- Worked on Full Stack development projects using React.js and FastAPI.
- Contributed to Machine Learning projects involving Gemma and Chandra models for text-based applications.
- Currently working on DevOps-related tasks including CI/CD, Docker, and deployment workflows.
- Gaining hands-on exposure across multiple domains including AI/ML, Full Stack Development, DevOps, and Testing during the internship program.
- Collaborating with teams on real-world projects and learning industry-level development workflows.

Inventeron Technologies And Business Solutions LLP

Aug 2025 – Nov 2025

DevOps Intern

Bengaluru, India

- Worked on CI/CD pipeline automation using Jenkins, GitHub Actions, and Docker.
- Managed containerized applications and deployment workflows using Kubernetes and Docker.
- Assisted in cloud infrastructure management and deployment on AWS services.
- Monitored application and server performance using Prometheus and Grafana.
- Collaborated with development teams to improve deployment reliability and automation workflows.

PROJECTS

DevSecOps CI/CD Pipeline with Jenkins, SonarQube, Trivy & Kubernetes

- Designed and implemented an end-to-end DevSecOps CI/CD pipeline to automate build, testing, security scanning, and deployment processes.
- Integrated Jenkins, Maven, SonarQube, Trivy, Docker, and Kubernetes for secure software delivery.
- Deployed containerized applications on Kubernetes clusters hosted on AWS EC2.
- Implemented monitoring and alerting using Prometheus and Grafana for infrastructure visibility.

E-Commerce DevOps Implementation

- Implemented end-to-end DevOps lifecycle including CI/CD, containerization, orchestration, and Infrastructure as Code.
- Provisioned AWS EKS infrastructure using Terraform modules.
- Built automated deployment pipelines using GitHub Actions and Argo CD.
- Configured networking, load balancing, and Route 53 domain mapping in AWS.

GitHub-JIRA Automation using Python

- Integrated GitHub Webhooks with a Python Flask application for workflow automation.
- Automated JIRA ticket creation using REST APIs and validation logic.
- Reduced duplicate issue creation by implementing automated verification checks.

TECHNICAL SKILLS

Cloud & Infrastructure:	AWS EC2, VPC, IAM, Networking Basics
CI/CD & Automation:	Jenkins, GitHub Actions, Git, Maven, Argo CD, Nexus
Containers & Orchestration:	Docker, Kubernetes, Containerization
DevSecOps Tools:	SonarQube, Trivy, Secure Image Scanning
Monitoring & Observability:	Prometheus, Grafana, Node Exporter, Blackbox Exporter
Frontend & Backend:	React.js, FastAPI
Programming Languages:	Python, Bash, Java
AI/ML Concepts:	Machine Learning Basics, Model Integration, Data Processing
Operating Systems:	Linux (Ubuntu, CentOS), Windows
Core Concepts:	Continuous Integration, Continuous Deployment, Infrastructure as Code, SDLC, Troubleshooting
